

TRIP TO THE BMW MUSEUM

Formen – Farben – Fahrzeuge

Shapes – Colors - Vehicles

On February 13th, a group of 6 children went to the BMW museum. We went with the U-Bahn and we were all very excited. What will we see? Will there be many cars in the museum? Will we learn about technology? Many questions arose during the displacement. And ... We finally arrived!

Firstly, two workers of the museum brought us together and explained interesting curiosities about cars, their shapes and their evolution throughout history.

How many shapes do cars have? Round wheels, rectangular motor, square windows ... But during the visit we discovered that they had not always been like this. The forms that we know today have changed throughout history.

Also, racing cars and their helmets had also evolved a lot. They looked very different!

Finally, they let us do our teamwork. There were some very creative crafts left and we could hang them on the wall of our classroom at Casa Luz.

It was a great experience for everyone. We enjoyed it and learned a lot. It was a great day and we hope to come again, to see and learn even more.
