

Field Trip into the forest with the pre-schoolers

On the 10th of November 2020 we went for a field trip with the pre-schoolers into a forest.

It was foggy and cold, so we got dressed very warm and started our way thru the forest, to find different animals and plants.

The teachers had prepared some papers with questions. We hit them in little bags and threw them close to the children, whenever they were not watching us.

On the papers we read: How do we need to behave in the forest? Why is a forest so important for us? What happens with all the leaves that fall of the trees in fall? Can you find animals? Which plants do you know? etc.

It's amazing to see how much some children already know and tell each other. Other things we could discover together.

We found some Mushrooms, worms and other interesting plants and animals.

We made a litte picknick with Brezeln in the forest and at a meadow we played some games to get warm again.

While discovering different things, one child called everyone: "Come here, someone wrote something on this stick! Its from the old times!" When we came we realized what it was: a woodworm had "written" in the wood, how beautiful!

What a great time to spend some hours outside were we can run, breath fresh air and experience so many things.
