

CASA LUZ'S TIMES 2021 - 2022

BMW – Junior Campus

Creative workshop with the pre-schoolers

On the 30th of March 2022, the pre-schoolers visited the Junior Campus of BMW.

We left early in the morning, because we had an important task to accomplish: create and build our own and individual car!

In the beginning, the two lovely ladies from the campus talked to us about different vehicles, how they look and drive.

Then we paired up to plan and build our own Car.

Starting with the sides, cutting, drawing, adding papers and other material. The floor got a shiny carpet and comfortable chairs. In the end, the car was covered with a roof.

The children learned many things about cars, had the chance to be creative and to try things out. They worked in a team of two, so they also had to compromise and convince the other child of their idea or to let go of their own wish.

In the end, we got to take our Cars back to CASA LUZ where we presented them to the other children and also in the CASA LUZ entrance, so everyone can see them.

We came back to CASA LUZ really tired, but happy, after such a fun and special experience.
