

## CASA LUZ'S TIMES 2021 - 2022

### Fressnapf – February 18th 2022

Our theme of the week was pets, so we took the subway and bus to go see some animals at the store Fressnapf. When we arrived, we were divided into two groups. We were allowed to observe the animals more closely and see what we needed to be able to have animals as our pets at home: food, cages, toys, etc.

First we went to the rabbits and guinea pigs. A lady who works there took out a big rabbit for us and we were all allowed to pet it carefully. It was so fluffy!

Then we went to the fish aquariums and were able to watch both small and larger fish swimming. Again, we were allowed to get closer to the fish: each could take some fish food and give the small fish something to eat.

Our next stop was the bird cages, but the blinds were closed and we couldn't see them. But they were so nice and took away the blinds for us so we could see all the budgies in all different colors better. They explained to us that the cages had the blinds closed because the budgies had only been in the store for a few days and needed to get used to being in a cage. Finally, we were allowed to see the reptiles! We were searching for some lizards but couldn't find any - we looked behind every branch and every stone. It turned out, the lizard was sold the day before! Fortunately, they took out a very large snail from its terrarium for us.

We were very excited to get back to CASA LUZ and tell the other kids what we had seen at Fressnapf!
